

SurveilStar Employee Monitoring

Website Management

[Record visited websites and filter non-work related and improper websites.]

Website Management Module Description

SurveilStar Application Management Module aims to control and monitor users' web browsing behavior. It enables you to control who can browse websites and what websites can be accessed. With appropriate policy control, improper websites can be blocked easily and detailed logs help administrators understand user behavior on web usage.

It not only records websites visited by users, but also records how long did the users spend on different web pages and how frequently do they visit the websites.

Website Access Control

Web Policy provides settings for administrators to effectively control users' access rights of websites. By setting appropriate web policies, administrators can easily control users' access rights of selected websites.

- Block users from browsing malicious, inappropriate and non-work related websites or web site categories during specified time range.
- Allow users browsing specified work-related websites or web site categories during specified time ranges.
- Allow users browsing non-work related websites during non-office hours.

Website Control Policy

Website Browsing Logging

SurveilStar records the websites which users have visited in detail. The contents of Web Logs include browsing time, computer, user, caption and URL.

- Record all the visited websites, URLs, captions, users, and computers to estimate users' browsing activity.
- Provide easy-to-use web browsing log enquiry.

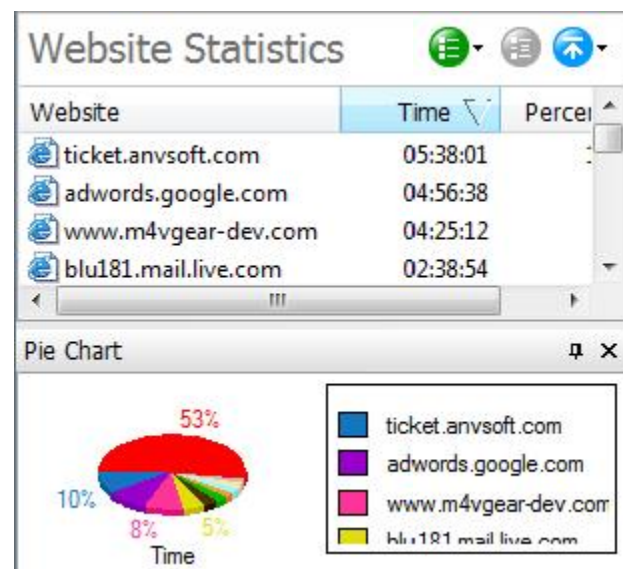

Website Browsing Logs

Website Statistics

Web statistics offers statistics on what websites users have visited. The statistical data provide references for administrators to easily understand the web browsing behavior of users.

- Summarize and gather statistics on websites visited.
- Gather statistics about how long do users spend on each website, how long do they spend on different categories of website and so on.
- Provide intuitive and easy-to-read report. Displays statistical data in a pie char or bar chart.
